Maarten Hoogerwerf did a master Computer Science at Delft University of Technology. During his study he worked part-time as a developer on several (web-) applications. For his masters thesis he came to Data Archiving and Networked Services (DANS), an institute of both the Royal Netherlands Academy of Arts and Science (KNAW) and the Netherlands Organisation for Scientific Research (NWO). For his thesis he investigated the application of persistent identifiers for a data archive. During and after this thesis he was responsible for developing a national infrastructure for persistent identifiers in the Netherlands. Currently he is investigating and experimenting with enhanced publications.
