LIST OF
SERIALS
INDEXED
FOR ONLINE USERS

2006

INTRODUCTION

The National Library of Medicine (NLM) designed the *List of Serials Indexed for Online Users* to provide bibliographic information for serials from which articles are indexed with the MeSH® vocabulary and cited in MEDLINE®, the backbone of NLM's PubMed® database. The symbol “s)” is used before titles that are routinely monitored, but indexed selectively; only articles relating to the fields of biomedicine and life sciences are indexed from these journals. Some serials cited in MEDLINE are not included in this publication because they are not monitored on an on-going basis and have yielded only a few citations over many years.

The symbol “*” identifies titles indexed in *Abridged Index Medicus*, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called “Core clinical journals.”

The 2006 edition contains 10,767 serial titles, including 4,959 titles currently indexed for MEDLINE as of January 2006, cited alphabetically by abbreviated title followed by full title.

FILING ORDER

Entries are sorted letter by letter. Numbers sort before letters. Special characters are ignored in sorting, except for the “&”, which sorts before numbers.

ABBREVIATIONS OF TITLES

The title abbreviations appearing in the *List of Serials Indexed for Online Users* are constructed using the *List of Title Word Abbreviations* (LTWA). The LTWA is maintained by the ISSN (International Standard Serial Number) International Centre. For more information about the Centre and its LTWA, please consult the ISSN Web site at <http://www.issn.org>.

Information about the rules NLM currently follows when constructing title abbreviations for items cited in NLM's online services can be found at <http://www.nlm.nih.gov/pubs/factsheets/constructtitle.html>.

DATES OF PUBLICATION

The dates of publication appear on the line below the title. These data contain the date of the first issue for titles currently published and the first and last dates for titles that have ceased publication or have been superseded or continued by another title. Unknown years are indicated with a “?”. The dates given are publication dates, and do not necessarily represent NLM's holdings or issues indexed.

INTERNATIONAL STANDARD SERIAL NUMBER

The International Standard Serial Number (ISSN) is a serial identifier consisting of a unique seven-digit number and an eighth check digit. The ISSN uniquely identifies a serial title, regardless of language, and is therefore useful in international information exchange and in machine storage of serials data. The ISSN is assigned to a serial title by the appropriate national center of the ISSN Network, which is coordinated by the ISSN International Centre in Paris. The National Serials Data Program (NSDP) of the Library of Congress is the United States Center of the ISSN Network. The ISSN is irrevocably linked to the key title of the serial. If the title of a continuing serial changes, a new ISSN must be assigned to the new title. If a title is published in both print and electronic format, there should be a separate ISSN for each format. In the *List of Serials Indexed for Online Users*, the ISSN is printed on the third line of the entry, and the format corresponding to each ISSN is designated by a parenthetical (P) for “print” or (E) for “electronic” following the number. More information about the ISSN is available at <http://www.issn.org>.

PERMANENT PAPER NOTICE

Entries for indexed serials known to be printed on acid-free paper contain the designation 'Acid-free'. The Acid-free notice appears to the left of the NLM unique identifier.

To report other indexed serials printed on acid-free paper, contact: Head, Preservation and Collection Management Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20894. To obtain information about permanent paper and how to indicate its use, see the latest edition of American National Standard ANSI/NISO Z39.48, "Permanence of Paper for Publications and Documents in Libraries and Archives" at <http://www.niso.org/>.

NLM UNIQUE IDENTIFIER

The NLM unique identifier consists of either a number with up to nine digits or an eight-digit number followed by an alphabetic character. It is used by medical libraries in reporting serial holdings data to DOCLINE Serial Holdings (formerly called SERHOLD ®), NLM's database of machine-readable holdings statements for serial titles held by U.S., Canadian, and Mexican biomedical libraries. The unique identifier appears on the right-hand side of the last line of each entry. In PubMed this number is labeled as "JID" in the MEDLINE display format and as "NLM ID" in the Entrez Journals database (<http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=Journals>).

When requesting serial interlibrary loans from the National Library of Medicine outside of DOCLINE® (NLM's automated interlibrary loan request routing and referral system), please include the NLM call number (or On Order or In Process notation) and the NLM unique identifier.

Holdings information indicating what issues of a title NLM owns and the NLM call number can be found in NLM's online catalog, LocatorPlus, at <http://locatorplus.gov>. Indexing coverage and detailed bibliographic records can be found at LocatorPlus and the NLM Catalog, an Entrez database, at <http://www.nlmcatalog.nlm.nih.gov>. Information about journal selection for indexing at NLM can be found at <http://www.nlm.nih.gov/pubs/factsheets/jsel.html>.

Questions can also be directed to NLM's Customer Service Desk at custserv@nlm.nih.gov (1-888-356-3656).
