BRIEF DESCRIPTION
A two-day workshop during which students make breakthroughs in their thought processes and compile or revise critical parts of their theses/dissertations.

OUTLINE OF WORKSHOP
Day 1: The logic and process of writing a thesis/dissertation; the research problem/question; the literature review; research design and methods.

Day 2: The research findings; the conclusion; proofreading and editing; the defence; individual consultations with the course presenter; voluntary student presentations.

LEARNING OUTCOMES
• Understanding and appreciating the logic and process of writing a thesis/dissertation.
• Formulating a feasible research problem/question.
• Conducting a focused review of related literature.
• Designing your study to maximise the validity of your findings.
• Explaining your methods to clarify the validity and reliability of your findings.
• Presenting your findings in a structured manner to address your initial research problem/question.
• Concluding your thesis/dissertation convincingly.
• Proofreading and editing a professional looking thesis/dissertation.
• Preparing for your defence or viva voce.

WHO SHOULD ENROL?
Postgraduate students from any field.
